Fighting Fat Jan 07 2022 While the statistics for obesity have been alarming in the twenty-first century, concern about fatness has a history. In *Fighting Fat*, Wendy Mitchinson discusses the history of obesity and fatness from 1920 to 1980 in Canada.

Through the context of body, medicine, weight measurement, food studies, fat studies, and the identity of those who were fat, Mitchinson examines the attitudes and practices of medical practitioners, nutritionists, educators, and those who see themselves as fat. *Fighting Fat* analyzes a number of sources to expose our culture's obsession with body image. Mitchinson looks at medical journals, both their articles and the advertisements for drugs for obesity, as well as magazine articles and advertisements, including popular "before and after" weight loss stories. Promotional advertisements reveal how the media encourages negative attitudes towards body fat. The book also includes over 30 interviews with Canadians who defined themselves as fat, highlighting the emotional toll caused by the stigmatizing of fatness.

Isometric Power Exercises for Martial Arts May 31 2021 This book has been approved by TWiEA - The World Isometric Exercise Association (www.TWiEA.com). Isometric exercise has been a part of almost every system of the martial arts ever devised. Even before isometrics were studied scientifically and modern science-based training techniques were devised they have been taught and practised in one form or another for thousands of years. It

was the great Bruce Lee and his love of isometric exercise who ensured that this system would forevermore be famously linked to all types of martial arts training. This book contains a valuable resource of practical isometric exercises designed to build serious strength, muscle and martial arts 'firepower' needed by all types of martial artists. More importantly, isometric exercise builds solid, hard, practical muscle and not the bodybuilder type of bulk that would seriously restrict a martial artist. One of the authors is recognised as being one of the leading authorities on isometric exercise, isometric exercise science and as a practitioner of several different styles of martial arts for almost 50-years. Among his many awards and accolades, he is a WKA 8th Degree Black Belt and a recipient of a WKA Lifetime Achievement Award. This gives him a unique and extremely valuable insight into science-based strength training and conditioning for the martial arts.

Isometric Power Revolution Nov 05 2021 Isometrics, when done correctly, can reshape a person's physique and add strength beyond imagination without the person ever moving a muscle. By powerfully contracting the muscle in an isolation hold, a person can create lean, perfectly sculpted muscles, shed fat, and achieve the unmistakable glow of perpetual youthfulness without ever having to go to a gym or lift weights or invest in expensive equipment. But the power of Isometrics lies in being taught how to do them correctly.

Physiology of Strength Sep 03 2021 First published in 1961, “[T]his book is the result of ten years of research and experiment in the problems of muscle strength and muscle training at the Max-Planck-Institut für Arbeitsphysiologie, Dortmund, Germany supplemented by further work at the Lankenau Hospital, Division of Research, Philadelphia, Pennsylvania. There is provided the present status of these problems, and there is demonstrated how muscle strength may be built and maintained with a minimum of time and effort. “The methods used are adaptable, with suitable modification, to children, to average young people, to athletes in training, to sedentary workers and older persons who wish to maintain bodily strength, and to those who have undergone surgery and need rehabilitation of the muscle structure—in short, to anyone who wishes to develop and maintain good muscle tone. “A strong and well-built body not only has pleasing appearance, it permits the undertaking of arduous physical activities or active

sports without undue fatigue, and with real enjoyment. "It is the author's hope that in this age of fast living and nervous tension, when there often seems neither time nor place for extensive exercise, this book will assist those who wish to maintain bodily strength and fitness—simply, at home, without elaborate equipment—on a do-it-yourself basis. It should prove of special benefit to teachers of physical education and rehabilitation."—THEODOR HETTINGER, M.D.
