Making of the IIT Brand Nov 09 2021 This book is an attempt to look at the ordinary IITians, the dreams they had, the hardships and challenges they faced, and the difference they made, as told by the IITians themselves. The book does not seek to glorify any particular IITian or focus on individual accomplishments. Instead, it looks at the stories of IITians from the first graduating class of 1955 till today . The book is a chronicle of the history of IITs in a uniquely personal way and their contributions to India and, in fact, the whole world. It looks at the making of the 'IIT' brand. Through the stories of IIT alumni, readers may find answers to the question of what attracts global multinationals to IIT campuses to recruit at salaries similar to those of MIT and Harvard graduates. The book is intended to be a light and interesting read. Having said this, it may be of particular interest to:

- youngsters across the world, who are interested in knowing about the struggles and success stories of IIT alumni
- students aspiring to enter IIT
- current students and faculty of new IITs, who want to understand the culture and life of alumni in the older IITs
- people abroad who have heard the name of IIT and the accomplishments of its alumni
- people who want to know how the IIT brand came into existence and whose entrance exam is the most competitive exam in the world
- the loved ones of numerous alumni who have narrated their stories in this book

This book is meant to be cherished by IIT alumni, current IITians, and the future generation of IITians.

Challenges and Opportunities of Open Educational

Resources Management Jun 04 2021 Education is a fundamental human right, yet much of the world's population lives with poor literacy. Due to rapidly growing technology and internet usage, open educational resources (OER) are increasingly being used to help transcend barriers to literacy while also aiding in educational attainment. With tremendous developments in ICTs, the education system of today has been enriched by various OERs. The optimal utilization of opportunities provided by the technological developments presents a profound challenge for education systems and has serious implications involving cost, access, equity, pedagogy, and quality. Challenges and Opportunities of Open Educational Resources Management is an essential research publication that explores access to information and societal and economic hurdles that contribute to informational inaccessibility. Highlighting topics such as e-resources, digital libraries, and information management, this book is ideal for librarians, academicians, computer scientists, researchers, policymakers, and students. Moreover, the book will provide insights and support executives concerned with the management of expertise, knowledge, information, and organizational development in different types of work communities and environments.

Quantitative Analysis in Financial Markets Oct 08 2021 This book contains lectures delivered at the celebrated Seminar in Mathematical Finance at the Courant Institute. The lecturers and presenters of papers are prominent researchers and practitioners in the field of quantitative financial modeling. Most are faculty members at leading universities or Wall Street practitioners. The lectures deal with the emerging science of pricing and hedging derivative securities and, more generally, managing financial risk. Specific articles concern topics such as option theory, dynamic hedging, interest-rate modeling, portfolio theory, price forecasting using statistical methods, etc. Contents: Estimation and Data-Driven Models: Transition Densities for Interest Rate and Other Nonlinear Diffusions (Y Ait-Sahalia) Hidden Markov Experts (A Weigend & S-M Shi) When is Time Continuous? (A Lo et al.) Asset Prices are Brownian Motion: Only in Business Time (H Geman et al.) Hedging Under Stochastic Volatility (K Ronnie Sircar) Model Calibration and Volatility Smile: Determining Volatility Surfaces and Option Values from an Implied Volatility Smile (P Carr & D Madan) Reconstructing the Unknown Local Volatility Function (T Coleman et al.) Building a Consistent Pricing Model from Observed Option Prices (J-P Laurent & D Leisen) Weighted Monte Carlo: A New Technique for Calibrating Asset-Pricing Models (M Avellaneda et al.) Pricing and Risk Management: One- and Multi-Factor Valuation of Mortgages: Computational Problems and Shortcuts (A Levin) Simulating Bermudan Interest-Rate Derivatives (P Carr & G Yang) How to Use Self-Similarities to Discover Similarities of Path-Dependent Options (A Lipton) Monte Carlo Within a Day (J Cárdenas et al.)
