This book suggests that religion, in its usual sense, can be replaced by something better, that the human spirit or subjectivity can be the subject of scientific study and that lack of purpose or design in the universe is not a handicap but a positive opportunity for intelligent beings to make of the universe and its contents what they reasonably can. The book breaks new ground in suggesting a radical alternative to religion. It offers a scientific and humanist alternative to religion which appeals to people's critical faculties rather than emotions or intuitions. It also challenges current views of causation and the principle of sufficient reason by stressing the subjectivity of our reasoning powers and clarifying these in relation to an independent external reality. It develops and elaborates a notion of the 'noosphere' within a theoretical system, this enables the notion to assume a scientific importance which it currently lacks because it is treated as an isolated, eccentric and rather mystical idea. This book is a collection of 15 visions of the Heavenly Sanctuary recorded in scripture from Psalms through the Book of Hebrews. The visions John saw inside the Sanctuary and recorded in Revelation are too long to include in this book and will be released in another volume to this series. The visions prophets witnessed and recorded in Heaven reflect turning points in earth's history, away from popular conceptions developed

over generations, back to God's original plan. Each vision showed those prophets what will happen, and why. In other words, those visions are written proof showing how the Lord's plans are in motion, and no earthly power will delay their fulfillment. Every prophecy and vision will be fulfilled on time, and in perfect order. Does the prospect of answering tough interview questions fill you with fear?
